

# Microsoft Entra ID

## Microsoft Entra ID – How do I link my account?

### Overview

To authenticate Microsoft Entra ID, you will need to provide the following information:

- Tenant ID

This guide will walk you through finding those credentials within Microsoft Entra ID.

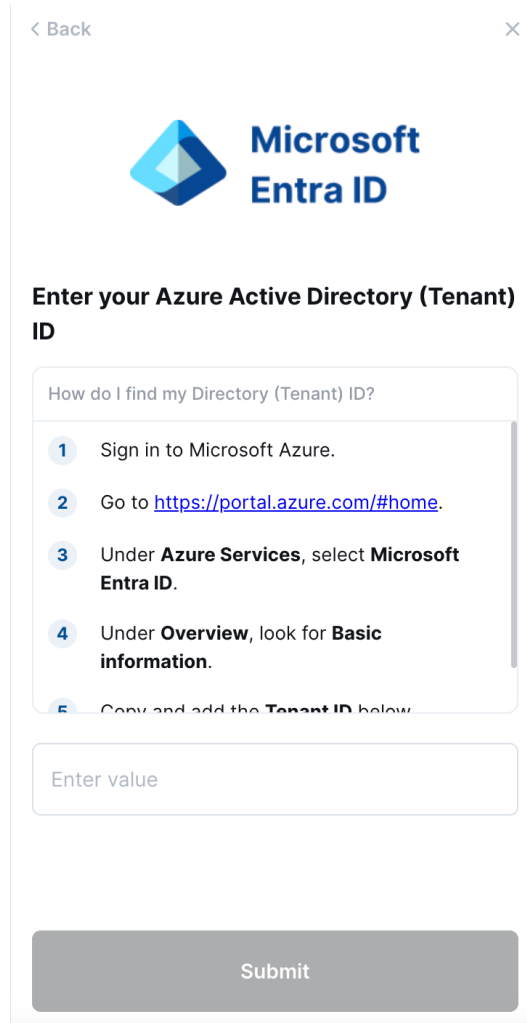

### Instructions

- Step 1: Click into Azure Entra ID
  - o Log into your Azure Portal and look for the "Azure services" section. Click on "Azure Entra ID".
- Step 2: Find Tenant ID under "Basic Information"
  - o After clicking on Microsoft Entra ID, you should be able to navigate to the Overview Page which has all the "Basic Information" for your Organization.

#### Basic information

Name	Default Directory	Users	6
Tenant ID	156ef986-1ead-4ce7-abab-dd7eb3ef3510 	Groups	3
Primary domain	prannoiymerge.onmicrosoft.com	Applications	5
License	Azure AD Free	Devices	0

- Step 3: Input Tenant ID into the linking flow
  - o Copy and paste the Tenant ID into the linking flow and click submit

The screenshot shows a mobile interface for entering a Tenant ID. At the top, there is a '< Back' button and a close 'X' icon. Below this is the Microsoft Entra ID logo. The main heading is 'Enter your Azure Active Directory (Tenant) ID'. A section titled 'How do I find my Directory (Tenant) ID?' contains a list of five numbered steps: 1. Sign in to Microsoft Azure. 2. Go to <https://portal.azure.com/#home>. 3. Under **Azure Services**, select **Microsoft Entra ID**. 4. Under **Overview**, look for **Basic information**. 5. Copy and add the **Tenant ID** below. Below the list is a text input field with the placeholder 'Enter value'. At the bottom is a large grey 'Submit' button.

After the connection is established, you will need to provide to your CSM the fields names for the integration and you have the chance to map any field from EntraID to the Rydoo equivalent fields.
