

Microsoft Entra ID

Microsoft Entra ID – How do I link my account?

Overview

To authenticate Microsoft Entra ID, you will need to provide the following information:

- Tenant ID

This guide will walk you through finding those credentials within Microsoft Entra ID.

Instructions

- Step 1: Click into Azure Entra ID
 - o Log into your Azure Portal and look for the "Azure services" section. Click on "Azure Entra ID".
- Step 2: Find Tenant ID under "Basic Information"
 - o After clicking on Microsoft Entra ID, you should be able to navigate to the Overview Page which has all the "Basic Information" for your Organization.

Basic information

Name	Default Directory	Users	6
Tenant ID	156ef986-1ead-4ce7-abab-dd7eb3ef3510 	Groups	3
Primary domain	prannoiymerge.onmicrosoft.com	Applications	5
License	Azure AD Free	Devices	0

- Step 3: Input Tenant ID into the linking flow
 - o Copy and paste the Tenant ID into the linking flow and click submit

< Back

Microsoft
Entra ID

Enter your Azure Active Directory (Tenant) ID

How do I find my Directory (Tenant) ID?

- 1 Sign in to Microsoft Azure.
- 2 Go to <https://portal.azure.com/#home>.
- 3 Under **Azure Services**, select **Microsoft Entra ID**.
- 4 Under **Overview**, look for **Basic information**.
- 5 Copy and add the **Tenant ID** below.

Enter value

Submit

1. After the connection is established, you will be given the option to map four fields:
 - a. RydooBranchName
 - b. RydooBranchID
 - c. RydooGroupName
 - d. RydooGroupID.

Map additional fields

Map additional fields between Rydoo Production and Hibob. Standard fields are already included.

The screenshot shows a mapping interface with three rows of field mappings. Each row consists of a source field name on the left, a right-pointing arrow in the middle, and a target field name on the right. The mappings are: 'contact_preference' to 'call_or_email', 'do_not_disturb' to 'do_not_call', and 'is_private' to 'not_public'. Below the mappings are two buttons: a black button labeled 'Map fields' and a white button labeled 'Skip for now'.

- If you skip this step, the Rydoo default mapping will be used for these fields.
- If you choose to continue with the field mapping, you will see the following options, and you have the chance to map any field from your HR tool to the Rydoo equivalent fields.

The screenshot shows a field selection dropdown menu with four rows. Each row has a search input field containing the text 'Select or start typing...' and a dropdown arrow pointing to a selected field name followed by the word 'Employee'. The selected field names are: 'RydooBranchID', 'RydooBranchName', 'RydooGroupID', and 'RydooGroupName'.

2. You can type in the field name or select from the dropdown.
3. After completing the mapping, you can click save and the authentication is now complete.
